Our proposal is to convert the Gomagoi fortress into a small winery and dairy, selling products from the South Tyrolean region.

The building would be used as both a shop and storage space, where visitors can taste and purchase products, view exhibitions of old cheese- and wine-making machinery and local history.

The fortress would become a new meeting point for the residents and visitors of Gomagoi, and a local advertising point for South Tyrolean produce.

In this presentation we have chosen to develop one half of the fortress: the "wine side".

### precedents

a meeting point

a wine advertisement

a dark space

a good connection with the landscape
